

CanDRIVE Student Fellowships

Are you interested in our aging population? Are you concerned about health-related issues and their effect on the mobility and psychosocial well-being of older persons?

The CanDRIVE Research Program is funded by the Canadian Institutes of Health Research, Institute of Aging. We are dedicated to identifying and addressing the health-related aspects of driving in older persons. Driving is an important aspect of maintaining one's independence and self esteem as one ages. However as much as it is desirable to promote the independence of such individuals, the safety implications of driving from an individual and societal perspective require careful consideration. The overall mission of CanDRIVE is to enhance older driver safety - "Keeping Safe Older Drivers Driving".

CanDRIVE would like to provide salary support (fellowships) to students (undergraduate and postgraduate) and post doctoral fellows who are interested in conducting research projects related to the health related issues of older drivers including the legal/legislative/policy and psychosocial aspects of determining the safety of older drivers. For a more comprehensive list of CanDRIVE research priorities, please contact us below. Unfortunately, we cannot provide funding for individual research projects.

Who is eligible?

Full time students - undergraduate, graduate and post doctoral candidates.
Applicants are required to have a CanDRIVE Member as their main research supervisor.

Please note that **Dr. Holly Tuokko** at this university is a CanDRIVE member. You can contact **Dr. Tuokko** by phone (250) 721-6576; room A118; e-mail htuokko@uvic.ca
Sedgewick 'A'

Length of Studentship	Financial Support
<ul style="list-style-type: none">• Undergraduate - four months (summer)• Masters - up to two years• PhD - up to three years• Post Doc - up to two years	<ul style="list-style-type: none">• Undergrad - \$1,000 per month for 4 months• Masters - \$17,000 per year• PhD - \$20,000 per year• Post Doc - \$35,000 per year
